ABOUT ME

Software Engineer focused on designing intelligent and scalable technology solutions, with a strong interest in artificial intelligence and cloud-based systems. Passionate about transforming complex problems into innovative and efficient software solutions through modern engineering approaches. Strong analytical mindset with a natural ability to translate requirements into effective technical designs. Known for precision, attention to detail, and consistently delivering high-quality results that exceed expectations. Recognized for creativity, dedication, and a strong work ethic across recent professional experiences, with a continuous drive to build impactful, intelligent, and scalable systems. Strong communication skills with the ability to collaborate effectively in team environments, clearly express technical ideas, and adapt communication to both technical and non-technical stakeholders.

EDUCATION

Computer Science Engineering Since September 2025
Private Higher School of Engineering and Technology (ESPRIT) Ariana, Tunisia

Applied Bachelor's Degree in Software Engineering and Information Systems From September 2021 to May 2025
Higher Institute of Information and Communication Technologies (ISTIC) Bordj Cedria

PROFESSIONAL EXPERIENCE

- Final Year Internship From February 2025 to May 2025 (3 months)
COFICAB – Center of Excellence Tunis, Tunisia
- Developed and deployed a critical intelligent, containerized web platform for managing wire break incidents across COFICAB's international manufacturing sites. The solution replaces inefficient legacy Excel-based workflows with a centralized, automated, and AI-driven system for real-time operational monitoring and decision support.
- The platform has been integrated across multiple global COFICAB sites and is currently in its first official production release, marking a key digital transformation initiative for the company.
- Key technologies:**
Flask (Python), Angular, SQL Server, Power BI, Docker, Google Generative AI, LLMs
- Key contributions:**
- Designed and built responsive web interfaces for operators and administrators with multi-site access.
 - Developed an AI-powered assistant using LLMs and Generative AI for natural language queries and real-time insights.
 - Integrated dynamic Power BI dashboards directly into the app for visual analytics and reporting.
 - Implemented back-end logic for automated calculations on wire consumption and break rates.
 - Used Docker for environment isolation and deployment across industrial settings.
- Full Stack Developer Intern From July 2024 to September 2024 (2 months)
Bi Geek Lac 1
- Developed an **e-learning platform** project:
 - **Frontend:** Built responsive user interfaces using **Angular**.
 - **Backend:** Developed APIs and handled data management with **Spring Boot**.
- IT Internship August 2023 (1 month)
Office of Civil Aviation and Airports (OACA), Tunisia Tunis
- Worked on **database management** and **network configuration**.
 - Participated in hardware maintenance and component assembly.

ADDITIONAL EDUCATION

Data Science Bootcamp: Business Analyst Diploma From June 2024 to September 2024
Bi Geek Lac1

- **Power BI:** Created multiple interactive reports, including a data visualization project for Ooredoo.
 - **PL-300 Certification** (Microsoft Power BI Data Analyst), scored **850/1000**.
- **PL/SQL:** Gained hands-on experience in database management and querying.
- **Machine Learning:** Implemented algorithms for **classification** and **regression**.
 - Explored **Artificial Neural Networks (ANN)** and **Convolutional Neural Networks (CNN)** for **Deep Learning** projects.
- **Python Programming:** Certified at **Python Level 1**.

PROJECTS

- E-Learning Platform Development**
Description: Developed an e-learning platform using Angular and Spring Boot. The platform includes features for course management, user registration, and progress tracking.
Technologies Used: Angular, Spring Boot, HTML, CSS, JavaScript, SQL
- Computer Vision for License Plate Detection and Safe Driving Monitoring**
Description: Developed a computer vision project for license plate detection and a safe driving monitoring system. Utilized YOLO (You Only Look Once) for object detection, OpenCV for image processing, and EasyOCR for optical character recognition (OCR) to read license plates. The project focused on real-time detection and safety analysis in driving scenarios.
Technologies Used: YOLO, OpenCV, EasyOCR, Python
- Chronicare — Intelligent Platform for Chronic Disease Management**
Developed a web and desktop application for chronic disease monitoring, combining Symfony, Java/JavaFX, and AI-driven decision support to improve patient tracking and healthcare coordination.
The system enhances data centralization, doctor-patient interaction, and administrative analysis through intelligent automation and real-time communication.
Key technologies:
Symfony (PHP), Java, JavaFX, MySQL, Python, Generative AI, LLMs, RAG, Real-time systems
Key contributions:
Built a full-stack architecture integrating a Symfony web platform with a Java/JavaFX desktop application for medical data management. Implemented an AI module using LLMs and RAG to generate contextual insights and personalized analysis from patient data. Developed an automated weekly reporting system producing health summaries based on patient history and trends. Added real-time notifications for doctor-patient communication and critical updates. Created an administrative analysis layer to profile system usage and support operational decision-making. Structured scalable data models for chronic disease tracking, treatment follow-up, and user management.

SKILLS

- AI & Generative AI:**
Generative AI • Large Language Models (LLMs) • Prompt Engineering • AI Chatbots • AI Agents • Retrieval-Augmented Generation (RAG) • LangChain • Deep Learning • Machine Learning • Neural Networks
- Database Management**
SQL • Data Migration • SQL Server • MySQL • PL/SQL • Database Design • Data Modeling
- Programming Languages**
Python • Java • JavaFX • JavaScript • TypeScript • PHP • C
- Web Development**
Angular • Symfony • Laravel • Spring Boot • Flask • React • Vue.js • Next.js • HTML • CSS • Bootstrap
- Mobile Development**
Flutter • FlutterFlow
- Tools & Technologies:**
Git/GitHub • Docker • REST APIs • Firebase

CERTIFICATIONS

- Power BI Data Analyst (PL-300)**
Issuer: Microsoft
Date: October 2024
- Scrum Master Certification**
Issuer: International Scrum Institute
Date: September 2024
- PCEP – Certified Entry-Level Python Programmer**
Issuer: Python Institute
Date: October 2024
- IBM Big Data Engineering Certificate**
Issuer: IBM
Date: January 2025

VOLUNTARY EXPERIENCE

Logistics Department Coordinator – ISTIC 2025 Graduation Ceremony (1st Edition istic graduation ISTIC – Institut Supérieur des Technologies de l'Information et de la Communication	From January 2025 to July 2025
Marketing Department Member Multiverse Club ISTIC, Bordj Cedria,	September 2022
Best Speaker Competition ISTIC ISTIC, Bordj Cedria	2023
Selected to represent my class Competed in public speaking contests, enhancing my communication and leadership skills.
